

生活環境輔導服務

「復康資源協會」為一香港非牟利團體，轄下除了「復康專科及資源中心」和「扶輪兒童復康專科及資源中心」提供復康諮詢服務外，亦為市民大眾提供一項建築環境顧問服務 - 「生活環境輔導服務」，簡稱 **EAS**。

EAS 旨為特殊需要人士提供有關環境設計的專業資料及諮詢服務，對象包括：肢體殘疾人士、感官受創者如視覺受損人士、精神病患者、智障人士及長者。

EAS 由專業建築師負責，他們會與「復康資源協會」中心的治療師緊密合作，攜手提供獨特的綜合服務，全面照顧殘疾人士的特殊需要，將復康科技、通用環境的設計理念和實用美學的原則共冶一爐，締造共融的社會，致力提升所有香港人的生活質素。

Environmental Advisory Service

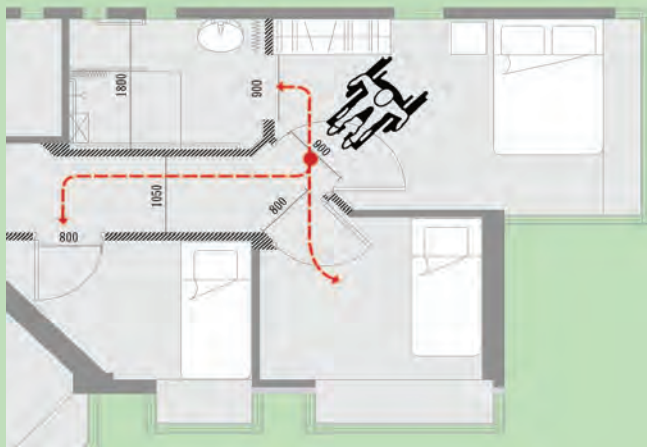

「**Environmental Advisory Service (EAS)**」 is a community architectural consultancy service operation in conjunction with the specialized rehabilitation service of the 「**Rehabaid Centre**」 and the 「**Rotary Rehabaid Centre for Children**」, all of which are services under the 「**Rehabaid Society**」.

EAS provides a specialized information and advisory service on the environmental needs for people with special need (including the physically disabled; the sensory disabled; the mentally ill; the mentally handicapped; and the elderly).

Qualified architects at **EAS** are working in close collaboration with the therapists of 「**Rehabaid Society**」 centres; the services offered to clients are comprehensive and totally unique, taking into full consideration of individual needs resulting from specific disabilities along with the technical, aesthetic and environmental aspects which combine to embrace diversity and provide a better quality of life for all people in Hong Kong.

EAS 為政府律師和私人律師提供專家報告，協助處理人身傷害索償案件的訴訟。專家報告會列明當事人的居所和工作地點是否適宜繼續使用，又會因應個別人士的需要提出環境上的改裝建議，並估計所涉及的開支。

EAS provides expert reports for government counsels and solicitors in practice to assist them in handling personal injury claim proceedings. These reports identify the suitability of the living accommodation or workplaces of the injured clients, and also give recommendations on the modifications required to these environments with an estimate cost in order to meet clients' specific needs.

評估流程及方法

Assessment Procedure and Methodology

1. 檢索並查閱屋宇署批准的有關圖則；
2. 進行實地視察和調查；
3. 確立通道改善的可行性；
4. 參考相關的本地或海外建築物規例及合適的設計準則；
5. 提出改善環境的建議；及
6. 評估因適應環境所涉及的開支。

1. Retrieve and inspect relevant approved plans from the Buildings Department;
2. Conduct site visit and investigation;
3. Ascertain possibilities of improvement of access;
4. Make reference to relevant local or overseas building regulations and design guidelines as applicable;
5. Make recommendation; and
6. Estimate the cost for adaptation.
